A. Unemployment, high vs low exposure
Main: top vs bottom 25%, with controls
No controls
Drop 2021 (COVID reopening)
Drop 2023-24 (low LFS response)
Proportional (Poisson)
Continuous exposure (25th to 75th pct)
Median split
Top 10% vs bottom 25%
Excluding groups with imputed exposure
B. Job starts of 22-25-year-olds, high vs near-zero exposure
Main: top 25% vs near-zero, ages 22-25
Drop 2021 (COVID reopening)
Drop 2023-24 (low LFS response)
Proportional (Poisson)
Comparison: all jobs below median
Treated: top 10% exposure jobs
Excluding occupations with imputed exposure
First interview only (each person once)
Comparison: ages 26-64 starting high-exposure jobs
Triple difference vs ages 26-64
Placebo: ages 26-64
